JEE-O flow series by Brian Sironi

Water takes on the shape of the object that contains it. That concept has been the starting point in designing the flow series. Up until the moment water flows from the faucet and is free to take on any shape, it has the shape of the pipes through which it flows. We rarely see the pipes; they are hidden away behind walls and under floors. These taps and mixers from the flow series reveal the piping, extending it into the bathroom.

The shower and faucets are made of stainless steel in a brushed finish and the bath and basins are made of DADOquartz.

JEE-O rio series

For this series we were inspired by the vibrant city of Rio de Janeiro. The capital of Brazil, known as the city of samba, gave us the energy to create the rio series. The thin rim bath and basins have their outer edges curve up for an effect that moves you.
